TOTAL	211,862					
		ı				

2008 and 2009 data not yet available.

Numbers on this form are very rough. Before 2008, New Mexico was not able to derive unduplicated numbers of pregnant women and children served by Title V. In 2008, New Mexico implemented the BEHR (Billing and Electronic Health Record) system. The Families FIRST and Children's Medical Services Programs are implementing a new case management software system "ChallengerSoft." WIC data are being analyzed. Vital Records and Health Statistics converted to an electronic birth certificate system. All of these in combination should improve the precision in reporting the numbers for this form in the future. The remaining challenge is staffing shortages and a hiring freeze.

It is not yet possible to get accurate, updated, unduplicated numbers.

In Unduplicated Count by Race, "White" is Hispanic and Caucasian combined.

Source of delivery data: NMVRHS 2007 resident births from the Natality Summary. NMVRHS does not record subcategories for Hispanic or Latino.

http://www.health.state.nm.us/pdf/2007%20Vital%20Statistics%20Natality%20Summarv.pdf

Source of number of infants in state: UNM BBER 2007 population estimates based on 2000 US Census data.

Source for title XIX eligibilty data: Medicaid MCH Statistical Report for FFY 2008 report request number: AH290363

All but a very small percent of deliveries are served by Title V through newborn screening.

At this time, it is not possible to get an exact count of how many infants in the state are served by Title V. Title V provides either infrastructure through salary support or funding for direct services for the following programs: newborn screening, immunization, high-risk prenatal care fund, families first, the family, infant, toddler program and the maternal and child health epidemiology program. Newborn Genetic Screening program is the most broad reaching and in 2007, 28,640 newborns received a genetic screen. That represents 91.6% of newborns. Deliveries and Infants Served by Title V is derived by taking 91.6% of infants/deliveries in each race/ethnicity category. This number will be revised when final 2007 birth data become available.

Efforts are underway to improve the collection, de-duplication and linkage of data to generate an accurate count of number of infants served by Title V.

Field Name: calls\_2

Row Name: Number of calls received On the State MCH Hotline This reporting period

Column Name: FY Year: 2009

Field Note:
This number refers to the NurseAdvice NM toll-free hotline, not BabyNet. NurseAdvice was launced in 2007. Of the 62,162 calls, 21,834 were from Females of childbearing age who were triaged, 10,941 were for Infants age 0-11 months, 24, 596 were for children age 1-18 years, and 4,791 were directly related to pregnancy.

#### **FORM 10** TITLE V MATERNAL & CHILD HEALTH SERVICES BLOCK GRANT STATE PROFILE FOR FY 2011 [SEC. 506(A)(1)]

STATE: NM

#### 1. State MCH Administration:

Title V is located in the Family Health Bureau in the Public Health Division in the NM Department of Health. The Title V Director is also the Bureau Chief of the Family Health Bureau. The Family Health Bureau oversees: Special Supplemental Nutrition Program for Women, Infants, and Children (WIC), Family Planning, Children with Special Health Care Needs, Perinatal Case Management/Home Visiting, Maternal Child Health, Maternal Child Health Epidemiology and Part C Care Coordination. School Health, Dental Health, Childhood Injury Prevention and Immunizations are located in other bureaus within the Public Health Division. Close coordination exists with these programs. The SECCS component is housed withing the Maternal Child Health Section of the Bureau. The Family Health Bureau consists of sections/programs, and administrative staff who oversee the implementation of preventive services to reproductive aged women, mothers, infants, children, including children and youth with special health care needs, and their families. The programs assess the needs of this population, and generate data to influence policy decision making. The services provided range from : 1) Direct safety-net health care services to individuals; 2) Family support services such as transportation, parent to parent support, case management, care coordination, WIC Commodity Supplemental Foods and Farmer's Market, outreach, translation, and health education; 3) Population-based services, such as newborn screening, surveillance, SIDS education and counseling, injury and violence prevention activities, and a marketing campaign to increase positive birth outcomes; and 4) Capacity or infrastructure building services, such as needs assessment, evaluation, planning, policy development, quality assurance, monitoring, training, information systems, and helping in developing systems of care. Several programs fund positions in the Region and Local Health Offices to implement these services. The Bureau houses a Medical Director, Bureau Chief, and support staff who work collaboratively to use resources strategically to meet identified needs.

<ul><li>a. Pregnant Women</li><li>b. Infants &lt; 1 year old</li></ul>	18,823 28,640	<u> </u>

- 11. Statewide Initiatives and Partnerships:
- a. Direct Medical Care and Enabling Services:

CYSHCN Enabling Services: 130 pediatric multidisciplinary specialty outreach clinics are provided around the state to enable CYSHCN to receive consultations with pediatric specialists in their own county or region. Family centered, community based Care Coordination services are provided for CYSHCN by 40 CMS social workers. The social workers also facilitate the development of community based systems of services for such children and their families. The NM Title V CYSHCN program is fortunate in that the provider base serves New Mexico's small population in a geographically large state. Providers and agencies are represented by key players throughout the state, many of whom share the MCH approach to care for CYSHCN. The Title V Program works with Parents Reaching Out, EPICS and Family Voices to assure critical family involvement in decision making and training of providers and families, collaboration regarding transition of CYSHCN, cultural competence issues and ongoing efforts in the state to create a medical home climate. The National Center for Cultural Competence assisted districts in planning for district appropriate cultural competence activities. The districts continue this work. With limited funding and increasing costs, the Title V program is now billing for care coordination (case management) for Medicaid clients receiving clinic services. The Title V program will negotiate with the MCO's to increase the breadth of funding to include more than a 2 hour billing per child.

#### b. Population-Based Services:

Newborn Hearing and Genetic Screening Programs screen approximately 29,000 children annually. Genetic screening is performed at Oregon State Public Health Laboratory, and the OSPHL pediatric specialists act as consultants to the NB Genetic Screening Program, NM primary care physicians, and families. Experts from families, professions, agencies and UNM participate in the Newborn Hearing Advisory Committee and the Newborn Genetic Advisory Committees which meet quarterly, thus assuring a statewide effort to provide family-centered, culturally competent, community based, coordinated screening, follow-up and care. The NB Genetic Screening follow-up nurse works closely with professional staff from UNM including metabolic and genetic specialist, pulmonologists, nutritionists and others to coordinate follow up for infants with conditions identified on the newborn screen, or those who need further testing to determine if they are affected. The Title V CYSHCN Program (CMS) works closely with UNM Continuum of Care, the Lend Program, Parents Reaching Out, Family Voices, the Health Systems Bureau, RPHCA funded clinics, 1000 providers, the NM Pediatric Society, the NM Medical Society, the Medicaid/SCHIP Programs, Indian Health Services, Long Term Services and the Family Infant Toddler Program.

c. Infrastructure Building Services:

(max 2500 characters)

CMS provides surveillance to the state on children with special health care needs. Work continues with these partners on the Family Infant Toddler Interagency Coordinating Council, the MCH Collaborative and the Health Transition Council to meet the MCH model and to increase the participation of key players in addressing MCH initiatives.

University operated perinatal outreach clinics are located in Albuquerque, Las Cruces, Alamogordo, Farmington, Taos, and Roswell. These clinics are staffed by University Maternal-Fetal Medicine sub-specialists (perinatologists). They provide ongoing local patient care and physician consultation. The maternal transport and obstetric referral system provides access to a Maternal-Fetal Medicine sub-specialist 24/7 for telephone consultations. They provide transport of patients requiring intensive management at the University. The University also provides sub-specialist physicians, diabetes educators and clinical nurse educators who travel the state to provide training programs that help to maintain a uniform and ever improving standard of obstetrical care for New Mexicans. High-risk obstetrical programs and case presentations are presented at community hospitals, in which all health care professionals interested in maternal child health may attend.

1. Section Number: Form11\_Performance Measure #12 Field Name: PM12

Field Name: PM12 Row Name: Column Name: Year: 2009 Field Note:

Screening rates appear lower than they are. The hearing screen field on the electronic birth certificate is not required, and many hospital personnel do not record this informatic especially in larger birthing facilities.

2. Section Number: Form11\_Performance Measure #12

Field Name: PM12 Row Name: Column Name: Year: 2008 Field Note: Screened: 18061

Unknown/Missing: 11654

Infant died/parents declined: 1

Screening rates appear lower than they are. The hearing screen field on the electronic birth certificate is not required, and many hospital personnel do not record this informatic especially in larger birthing facilities. NMVRHS is pursuing a change in regulation that would require that hearing screening status be recorded on the birth certificate.

3. Section Number: Form11\_Performance Measure #12

Field Name: PM12 Row Name: Column Name: Year: 2007 Field Note:

Please see note from 2006.

## FORM 14 LIST OF MCH PRIORITY NEEDS

[Sec. 505(a)(5)]

**STATE: NM FY: 2011** 

Your State's 5-year Needs Assessment should identify the need for preventive and primary care services for pregnant women, mothers, and infants; preventive and primary care services for children and services for Children with Special Health Care Needs. With each year's Block Grant application, provide a list (whether or not the priority needs change) of the top maternal and child health needs in your state. Using simple sentence or phrase ,list below your State's needs. Examples of such statements are: "To reduce the barriers to the delivery of care for pregnant women, " and "The infant mortality rate for minorities should be reduced."

MCHB will capture annually every State's top 7 to 10 priority needs in an information system for comparison, tracking, and reporting purposes; you must list at least 7 and no more than 10. Note that the numbers listed below are for computer tracking only and are not meant to indicate priority order. If your State wishes to report more than 10 priority needs, list additional priority needs in a note at the form level.

- 1. Improve access to and use of health and health related services including health insurance and other coverage such as Medicaid, S-SHIP for all MCH population groups.
- 2. Improve the transition from childhood ages to young adulthood for children and youth with special health care needs to assure uninterrupted access to health care and related transition services.
- 3. Improve indicators of health in the preconception and perinatal periods, including but not limited to smoking, alcohol, folic acid use, family violence, intention of pregnancy, access to and use of health care, and maternal depression.
- 4. Reduce indicators of violence affecting the MCH population with focus on reducing the number of children witnessing violence, the rate of substantiated child abuse and on reducing the percent of women who report physical abuse before and during pregnancy.
- 5. Reduce unintended births to teens, and the related prevalence of sexually transmitted infections among teens.
- 6. Promote healthy weight and physical fitness among parents and their chilren; reduce overweight and obesity in tehMCH population with focus on early childhood and adolescents to reduce psychological and chronic disease problems.
- 7. Reduce rates of fatal and non-fatal unintentional injury among children and teens, with emphasis on interventions to prevent motor vehicle crash and household accident injuries.
- 8. Promote positive youth development experiences with emphasis on building personal and social assets at the family, school and community levels, and with a view to reduce the proportion of youth who engage in risk behaviors that have serious life-long consequences.
- 9. Strengthen the role of males in MCH through promotion of effective initiatives in healthy fatherhood and in reporductive health through male involvement strategies.
- 10. Monitor the health of immigrants in the MCH population.

# FORM 16 STATE PERFORMANCE AND OUTCOME MEASURE DETAIL SHEET STATE: NM

SP(Reporting Year)	\#	- 1

PERFORMANCE MEASURE:

The number of New Mexico counties and tribal entities implementing positive youth development strategies defined by 6

kev criteria

STATUS:

Active

GOAL

To promote positive youth development, throughout New Mexico

**DEFINITION** 

Numerator:

Numerator: Number County and Tribal Community Health Improvement Councils (CHICs) that meet five key criteria for implementing positive youth development. 1-CHIC has identified positive youth development as a priority in its annual plan; 2-CHIC membership includes at least two youth each year; 3-CHIC has at least one staff or contractor that has completed recommended training in positive youth development; 4-CHIC has a plan for at least one science-based intervention in the annual plan; 5- CHIC plan for youth involved youth and approved by youth; 6-CHIC coordinates efforts with School Health Advisory Committee (SHAC).

Denominator:

Denominator Total number of County CHICs and Tribal CHICs in the state.

Units: 6 Text: Scale

**HEALTHY PEOPLE 2010 OBJECTIVE** 

The National Initiative to Improve Adolescent Health by the Year 2010 (NIIAH 2010) has identified 21 Ddefines adolescent health broadly, complementing the traditional focus on categorical health problems and antecedents by concepts of healthy adolescent development and health-promoting environments to provide a proactive foundation for promoting the health and safety of adolescents and young adults. The NIIAHs goal is to foster cooperation amongpartners, including states: its framework seeks new approaches, work with variety partners, sction-oriented perspective on youth development.

**DATA SOURCES AND DATA ISSUES** 

This is not a population-based indicator but rather an indicator of the state program's performance based on 6 criteria. Population-based proxy measures for positive youth development are in the NM Youth Risk Resiliency Survey and for youth age 18-24 & adults in the NM Behavioral Risk Factor Surveillance System. This data is available by county, and will be collected every two years based on reports of the 6 criteria; first data available for 2005 report. The measure should show some impact if the assumptions about criteria are related to effectiveness of the program effort.

SIGNIFICANCE

The National Initiative is based on a comprehensive approach which recognizes that seemingly isolated adolescent problems are influenced by common antecedent factors – those that protect and those that can jeopardize health and safety. Youth opportunities and supports are increasingly important in a world of rapidly changing labor markets, rationales for civic engagement, and a growing need to communicate and cooperate across age, ethnic, religious, cultural, and gender boundaries. Youth who spend time in communities that are rich in developmental opportunities for them experience less risk and show evidence of higher rates of positive development. Diverse program opportunities are more likely to support broad adolescent development and attract the interest of and meet the needs of a greater number of youth. Cultural groups vary in what characteristics they most value for their youth and adults. Core human needs that researchers agree are universal include the need to feel competent, to be socially connected, to feel valued and respected, to actually be making a difference in one's social group, to feel that one has some control over one's own behaviors and experiences, and to have one's physical and emotional needs met. Social assets include: caring and compassion; character; competence in academic, social, and vocational arenas; confidence; connections.

SP(Reporting Year) # PERFORMANCE MEASURE: Percent of first newborns/moms receiving support services/parenting through community home visiting/support programs STATUS: The development of a state-wide system of family support which promotes optimal infant & child development and well GOAL being. **DEFINITION** The proportion of new mothers who report home visiting or other support services before delivery and after delivery is reported in NM PRAMS. Numerator: Numerator: Number of first newborns/moms receiving HV or support services Denominator: Denominator: Total number of first births annually (by county) & for state Units: 100 Text: percent **HEALTHY PEOPLE 2010 OBJECTIVE DATA SOURCES AND DATA ISSUES** PRAMS and Families First data for #1; would have to explore if there are existing data bases or develop for #2.

exposure to violence through media; increasing number of children living in poverty

SIGNIFICANCE

In today's world there are increasing challenges of parenting and providing stable family life as demonstrated by the

following: changes in family structure--increase in teen & single parents and those not prepared to parent their children; increased divorced rate, children spending less time with their parents and more children living in foster homes; increased

SP(Reporting Year) #\_\_\_\_\_3

PERFORMANCE MEASURE: Reduce unintended pregnancy in New Mexico to less than 30% of births

STATUS: Active

GOAL To improve maternal and infant health by reducing unintended pregnancy in New Mexico to less than 30% of live births.

**DEFINITION**Unintended pregnancies are those that a mother reported as not wanted or wanted later; Intended pregnancies are those a

mother reported as wanted then or sooner.

Numerator

Number of mistimed and unwanted births from NM PRAMS

Denominator:

Number of NM Resident Births
Units: 100 Text: percent

**HEALTHY PEOPLE 2010 OBJECTIVE** 

DATA SOURCES AND DATA ISSUES NM PRAMS: 1997 is our first year of data; data will be ready for analysis in November 1998. Vital records for 1997 closed in

July 1998; data are weighted by CDC PRAMS, accounting for factors in the sample frame, response rates per stratum, and response rate per question. Henceforth, data for each year will be produced the winter of the following year, 1998 data in

November 1999 and so on.

SIGNIFICANCE Unintended pregnancy is associated with demographic characteristics of teen ages, single women/men, lower education

and income levels in women and men; maternal health problems of poor access to family planning services, late prenatal care, smoking, family violence and other family stressors; infant outcomes of low birth weight, late or no infant health care

including imunizations.

SP(Reporting Year) #\_\_\_\_\_4

PERFORMANCE MEASURE: Reduce the number of children witnessing violence (exposed to domestic or sexual violence) as expressed by percent of

children present at a domestic violence scene.

STATUS:

GOAL Reduce the number of children witnessing violence (exposed to domestic violence or sexual violence).

**DEFINITION**The percent of children who were present at a domestic violence scene as reported by law enforcement.

Numerator:

The number of children present at a domestic violence scene as reported by law enforcement.

Denominator:

The number of domestic violence police reports

Units: 100 Text: Percent

**HEALTHY PEOPLE 2010 OBJECTIVE** 

DATA SOURCES AND DATA ISSUES UCR data has its own limitations, mainly limited reporting by local law enforcement jurisdictions, and limited disclosure by

the victims themselves. We hope to get a better measure developed that includes DV shelter and rape crisis center data. Because of a large degree of under reporting, these sources represent only a portion of the violence experienced by

children. There is no direct measure of children witnessing domestic violence.

SIGNIFICANCE

Many children and young adults are exposed to domestic violence in the home or experience some form of sexual violence

from people they know. There is increasing documentation about the adverse effects, including increased substance abuse, teen pregnancy, truancy, suicidal behaviors, eating disorders and aggressive acting out behaviors. There is a profound lack of mental health infrastructure to deal with these exposures, high prevalence of domestic violence in our society and significant lack of protective skills in avoiding acquaintance rape. We are using the rape rate as an index at the present time because it is accurate, can be tracked, and there is a clear correlation between children who witness violence and the

propensity to engage in violent acts including rape as they get older.

SP(Reporting Year) #\_\_\_\_5

PERFORMANCE MEASURE: Increase the proportion of women who report having all six criteria of the NM Healthy Birth Index

STATUS:

GOAL To improve the health and well being of new mothers and infants by promoting healthy behaviors among expectant parents

in New Mexico.

**DEFINITION**The percent of new mothers for whom 1) the pregnancy was intended; 2) no binge or heavy drinking; 3) no smoking: 4) no physical abuse by husband or partner during pregnancy; 5) awareness & use of folic acid; and 6) entered prenatal care in

first trimester.

Numerator:

The number of new mothers for whom 1) the pregnancy was intended; 2) no binge or heavy drinking; 3) no smoking: 4) no physical abuse by husband or partner during pregnancy; 5) awareness & use of folic acid; and 6) entered prenatal care in

first trimester. BAsed on NM PRAMS, representative sample

Denominator:

The number of live births. Derived from sample statistics, NM PRAMS

Units: 100 Text: Percent

HEALTHY PEOPLE 2010 OBJECTIVE HP 9-1: Increase the number of intended pregnancies to 70%

HP 16-17: Increase abstinence by pregnant women from alcohol to 94%, tobacco to 99%; HP27-6: Increase smoking cessation from 14-30%. Related Objective: 15-34: Reduce the rate of physical assault by current or former intimate partners. HP 16-16 Increase pregnancies begun with optimum folic acid levels from 21% to 80%. HP16-6: Increase first

trimester care from 83-90%

DATA SOURCES AND DATA ISSUES

This data is collected by the Pregnancy Risk Assessment Monitoring System, it is a core question for all PRAMS states.

There may be under-reporting due to the nature of the question

SIGNIFICANCE Elements of the healthy birth index have potential for a highly positive impact on maternal and infant health, well-being and

utcomes.

SP(Reporting Year) #\_\_\_\_\_6

**DATA SOURCES AND DATA ISSUES** 

PERFORMANCE MEASURE: Reduce the proportion of women who report being physically abused by husband or partner during pregnancy.

STATUS: Activ

GOAL To improve the health and well being of new mothers and to reduce family violence and the risk of children being exposed

to family violence.

**DEFINITION** Rate: Weighted percent of women who report physical abuse by partner in pregnancy from PRAMS surveillanc

Numerator:

Numerator: Number women abused is an estimate derived from PRAMS surveillanc

Denominator:

Denominator Population of live births, estimate derived from PRAMS surveillance

Units: 100 Text: Percent

**HEALTHY PEOPLE 2010 OBJECTIVE** See related HP 2010 objectives:

No specific Healthy People 2010 Objective for this age group and gender. Related Objective: 15-34: Reduce the rate of physical assault by current or former intimate partners. Target 3.3 physical assaults per 1,000 persons age 12 and older. Bseleine was 4.4 in 1998. Disparities reported: rate for females was 7.2 per 1,000 females; males 1.3 per 1,000 males.

This data is collected by the Pregnancy Risk Assessment Monitoring System, it is a core question for all PRAMS states.

Boolome Mad 1.7 m 7000. Bisparince reperted 1.1 de 16. females Mad 1.2 per 1,000 females, maios 1.6 per 1,000 maios.

There may be under-reporting due to the nature of the question.

SIGNIFICANCE Prenatal physical abuse of mothers can result in fetal death, early labor, preterm, low birthweight or maternal medical

problems. It is associated with severe emotional distress and threatens healthy family life. Children who are exposed to domestic violence are at increased risk for behavioral difficulties, emotional problems, poor academic performance,

delinquency and impaired health during adulthood

Page 73 of 130

SP(Reporting Year) #\_\_\_\_8

PERFORMANCE MEASURE: Increase the proportion of women who deliver a live infant who are reported to have been screened for syphilis during

pregnancy. Active

STATUS:

GOAL To assure that all pregnant women are screened for syphilis during their pregnancy.

**DEFINITION** 

Numerator:

Numerator: The number of women delivering a live infant in New Mexico that are reported to have been screened for

syphilis.

Denominator:

Denominator: the number of women who deliver a live infant in New Mexico.

Units: 100 Text: Percent

**HEALTHY PEOPLE 2010 OBJECTIVE** 

Related to Objectives 16.6: Increase the proportion of pregnant women who receive early and adequate prenatal care.

Related to Objectives 16.14: Reduce the occurrence of developmental disabilities.

**DATA SOURCES AND DATA ISSUES** 

New Mexico Birth File from the Bureau of Vital Records and Health Statistics.

SIGNIFICANCE

Screening all pregnant women for syphilis is recommended by the US Preventive Services Task Force in order to decrease the number of infants with clinical manifestation of congenital syphilis. Congenital syphilis infection results in fetal or perinatal death in 40% of affected pregnancies, as well as disease complications in surviving newborns, including central

nervous system abnormalities; deafness; multiple skin, bone, and joint deformities; and hematological disorders.

Field Name: HSC01 Row Name: Column Name: Year: 2008 Field Note:

2007 hospital discharge data are not yet available as of July 2009, but are expected to be available later in the summer.

3. Section Number: Form17\_Health Systems Capacity Indicator #01

Field Name: HSC01 Row Name: Column Name: Year: 2007 Field Note:

2007 and 2008 Hospital Inpatient Discharge Data (HIDD) for asthma patients are not yet available.

HEALTH SYSTEMS CAPACITY MEASURE # 02					
The percent Medicaid enrollees whose age is less than one year during	ng the reporting year	who received at leas	st one initial periodic s	creen.	
			Annual Indicator Da	ata	
	2005	2006	2007	2008	2009
Annual Indicator	63.5	68.1	76.8	74.4	74.4
Numerator	10,927	13,460	15,880	16,237	16,237
Denominator	17,218	19,766	20,684	21,815	21,815
Check this box if you cannot report the numerator because 1. There are fewer than 5 events over the last year, and 2. The average number of events over the last 3 years is fewer than 5 and therefore a 3-year moving average cannot be applied.  (Explain data in a year note. See Guidance, Appendix IX.) Is the Data Provisional or Final?				Final	Provisional

1. Section Number: Form17\_Health Systems Capacity Indicator #07A

Field Name: HSC07A Row Name: Column Name: Year: 2009 Field Note:

2009 Denominator data not yet available.

2. Section Number: Form17\_Health Systems Capacity Indicator #07A

Field Name: HSC07A Row Name: Column Name:

Year: 2008 Field Note:

Denominator: 43% of children, ages 1-20 in 2008 (587,000). Number of children is estimated by Bureau of Business and Economic Research; BBER does not provide projections for individual ages past 20. 43% is the estimated percentage of children living at or below 200% FPL.

Numerator: Source: NM Medicaid Office. Data from October 1, 2007- September 30, 2008. Medicaid report number AH290363 The number of medicaid children age 1-20, that are recipients of service.

Note on BBER data: Beginning with the population estimates for 2007, the University of New Mexico Bureau of Business and Economic Research (BBER) updated its estimates of age-specific migration with new data. This change caused a break in continuity between the 2006 and 2007 estimates. Older age groups were affected more than others. For rates calculated from BBER population estimates, any rate differences from 2006 to 2007 must be interpreted with caution, as they may be partly attributable to the change in population estimates used in the rate denominators.

3. Section Number: Form17\_Health Systems Capacity Indicator #07A

Field Name: HSC07A Row Name: Column Name: Year: 2007 Field Note:

Denominator: 43% of children, ages 1-20 in 2007 (579,589). Number of children is estimated by Bureau of Business and Economic Research; BBER does not provide projections for individual ages past 20. 43% is the estimated percentage of children living at or below 200% FPL.

Numerator: Source: NM Medicaid Office. Data from October 1, 20056- September 30, 2007. Medicaid report number AH290363 The number of medicaid children age 1-20, that are recipients of service.

HEALTH SYSTEMS CAPACITY MEASURE # 07B					
The percent of EPSDT eligible children aged 6 through 9 years who h	nave received any de	ental services during t	he year.		
			Annual Indicator Da	ata .	
	2005	2006	2007	2008	2009

The Children's Medical Services Program (CMS) is transitioning to a new data system, and the number of CMS clients that are also SSI beneficiaries is not currently available.

# FORM 18 HEALTH SYSTEMS CAPACITY INDICATOR #05 (MEDICAID AND NON-MEDICAID COMPARISON) STATE: NM

INDICATOR #05 Comparison of health system capacity	V=15	POPULATION			
indicators for Medicaid, non-Medicaid, and all MCH populations in the State	YEAR	DATA SOURCE	MEDICAID	NON-MEDICAID	ALL
a) Percent of low birth weight (< 2,500 grams)	2007	Payment source from birth certificate	6.4	5.6	6
b) Infant deaths per 1,000 live births	2007	Payment source from birth certificate	6	6	6
c) Percent of infants born to pregnant women receiving prenatal care beginning in the first trimester	2007	Payment source from birth certificate	68.8	78.8	73.8
d) Percent of pregnant women with adequate prenatal care(observed to expected prenatal visits is greater than or equal to 80% [Kotelchuck Index])	2007	Payment source from birth certificate	69	69.1	69.1

### FORM 18 HEALTH SYSTEMS CAPACITY INDICATOR #06(MEDICAID ELIGIBILITY LEVEL) STATE: NM

INDICATOR #06 The percent of poverty level for eligibility in the State's Medicaid programs for infants (0 to 1), children, Medicaid and pregnant women.	YEAR	PERCENT OF POVERTY LEVEL MEDICAID (Valid range: 100-300 percent)
a) Infants (0 to 1)	2008	185
b) Medicaid Children (Age range 1 to 19) (Age range to ) (Age range to )	2009	
c) Pregnant Women	2009	185

### FORM 18 HEALTH SYSTEMS CAPACITY INDICATOR #06(SCHIP ELIGIBILITY LEVEL) STATE: NM

INDICATOR #06 The percent of poverty level for eligibility in the State's SCHIP programs for infants (0 to 1), children, SCHIP and pregnant women.	YEAR	PERCENT OF POVERTY LEVEL SCHIP
a) Infants (0 to 1)	2009	235
b) Medicaid Children (Age range 1 to 19 ) (Age range to ) (Age range to )	2009	235
c) Pregnant Women		

#### FORM NOTES FOR FORM 18

2008 and 2009 Birth files not yet available.

#### FIELD LEVEL NOTES

Section Number: Form18\_Indicator 06 - SCHIP Field Name: SCHIP\_Women Row Name: Pregnant Women

Column Name: Year: 2011

SCHIP does not cover pregnant women in New Mexico.

Section Number: Form18\_Indicator 05 Field Name: CareFirstTrimester

Row Name: Percent of infants born to pregnant women receiving prenatal care beginning in the first trimester

Column Name: Year: 2011
Field Note:
2008 and 2009 Birth file not yet available

Section Number: Form18\_Indicator 05
Field Name: AdequateCare
Row Name: Percent of pregnant women with adequate prenatal care

Column Name: Year: 2011 Field Note:

2008 and 2009 birth file not yet available.

#### **FORM 19** HEALTH SYSTEMS CAPACITY INDICATOR - REPORTING AND TRACKING FORM STATE: NM

HEALTH SYSTEMS CAPACITY INDICATOR #09A (General MCH Data Capacity)
(The Ability of the State to Assure MCH Program Access to Policy and Program Relevant Informatioin)

DATABASES OR SURVEYS	Does your MCH program have the ability to obtain data for program planning or policy purposes in a timely manner?  (Select 1 - 3) *	Does your MCH program have Direct access to the electronic database for analysis? (Select Y/N)
ANNUAL DATA LINKAGES Annual linkage of infant birth and infant death certificates	2	No
Annual linkage of birth certificates and Medicaid Eligibility or Paid Claims Files	2	No
Annual linkage of birth certificates and WIC eligibility files	1	No
Annual linkage of birth certificates and newborn screening files	2	No
REGISTRIES AND SURVEYS Hospital discharge survey for at least 90% of in-State discharges	2	No
Annual birth defects surveillance system	2	No
Survey of recent mothers at least every two years (like PRAMS)	3	Yes

#### \*Where:

- 1 = No, the MCH agency does not have this ability.
  2 = Yes, the MCH agency sometimes has this ability, but not on a consistent basis.
  3 = Yes, the MCH agency always has this ability.

#### **FORM 19** HEALTH SYSTEMS CAPACITY INDICATOR - REPORTING AND TRACKING FORM STATE: NM

DATA SOURCES	Does your state participate in the YRBS survey? (Select 1 - 3)*	Does your MCH program have direct access to the state YRBS database for analysis? (Select Y/N)
Youth Risk Behavior Survey (YRBS)	3	No
Other:		

### \*Where: 1 = No

- 2 = Yes, the State participates but the sample size is <u>not</u> large enough for valid statewide estimates for this age group. 3 = Yes, the State participates and the sample size is large enough for valid statewide estimates for this age group.

1. HEALTH SYSTEMS CAPACITY INDICATOR #09B was formerly reported as Developmental Health Status Indicator #05.

#### FORM 21 **HEALTH STATUS INDICATORS DEMOGRAPHIC DATA**

STATE: NM

HSI #10 - Demographics (Geographic Living Area) Geographic living area for all resident children aged 0 through 19 years old. (Demographics)

GEOGRAPHIC LIVING AREAS	TOTAL
Living in metropolitan areas	287,332
Living in urban areas	167,804
Living in rural areas	358,298
Living in frontier areas	37,296
Total - all children 0 through 19	563,398

Note: The Total will be determined by adding reported numbers for urban, rural and frontier areas.

# FORM 21 HEALTH STATUS INDICATORS DEMOGRAPHIC DATA STATE: NM

HSI #11 - Demographics (Poverty Levels) Percent of the State population at various levels of the federal poverty level. (Demographics)

POVERTY LEVELS	TOTAL
Total Population	2,080,048.0
Percent Below: 50% of poverty	
100% of poverty	
200% of poverty	38.7

# FORM 21 HEALTH STATUS INDICATORS DEMOGRAPHIC DATA STATE: NM

HSI #12 - Demographics (Poverty Levels) Percent of the State population aged 0 through 19 at various levels of the federal poverty level. (Demographics)

POVERTY LEVELS	TOTAL	
Children 0 through 19 years old	466,641.0	
Percent Below: 50% of poverty	10.7	
100% of poverty	<u>27.7</u>	
200% of poverty	23.4	

#### FORM NOTES FOR FORM 21

IMPORTANT NOTE REGARDING BBER POPULATION DATA: Beginning with the population estimates for 2007, the University of New Mexico Bureau of Business and Economic Research (BBER) updated its estimates of age-specific migration with new data. This change caused a break in continuity between the 2006 and 2007 estimates. Older age groups were affected more than others. For rates calculated from BBER population estimates, any rate differences from 2006 to 2007 must be interpreted with caution, as they may be partly attributable to the change in population estimates used in the rate denominators.

For Infants and Children Enumerated by race: BBER does not distinguish between "Asian" and "Native Hawaiian or Other Pacific Islander" in its projections. It also does not provide information on "More than one race reported" or "Other and Unknown."

For Infants and Children enumerated by ethnicity: BBER does not provide projections of "Ethnicity Not Reported."

Infant and Child mortality data source: NM Vital Records and Health Statistics data analyzed by MCH Epidemiology Program.

For live births by race:

a. "Asian" is Chinese, Japanese and Filipino.

b. The total live births does not include 5 births to White/Caucasian women, and 2 births to American Indian/Native Alaskan women whose ages were unknown. The true total of live births is 31254.

3. For live births by ethnicity:

Ages were unknown for 6 non-hispanic women and 1 hispanic woman.

For number of children enrolled in WIC: Data Note for title V MCH: These are calendar year 2008 WIC data for clients who were actually seen in 2008 in contrast to those who had a certification period that began, ended or continued in 2008 but who may not have been seen. There were an additional 10,970 who had an active certification but who were not seen; these include children who reached 5th birthday, moved or dropped out of WIC. There is an under-count of infants who were born in November and December 2008 due to unresolved issues in the programming to abstract records from the WIC system. It's estimated that the undercount was on the order of 1500 infants. This under-count has been present in all previous years as well; and will be resolved in the coming year.

Source for povety-level: 2007 National Survey of Children's Health. It is of children ages 0-17.

#### FIELD LEVEL NOTES

 Section Number: Form21\_Indicator 09A Field Name: HSIRace\_SingleParentPercent

Row Name: Percent in household headed by single parent

Column Name: Year: 2011 Field Note:

Source: National Survey of Children's Health http://nschdata.org/DataQuery/DataQueryResults.aspx

Percent of children in "Mother-only household with no father of any type present."

"White" is White and Hispanic, all other races are non-Hispanic.

Non-Hispanic Asian, AINA, Native Hawaiian, or Pacific Islander are grouped by NSCH as "Other" because of small samples sizes.

2. Section Number: Form21\_Indicator 09A Field Name: HSIRace\_TANFPercent Row Name: Percent in TANF (Grant) families

Column Name: Year: 2011 Field Note:

The number by race of TANF children is estimated based on the percent by race of head of houshold in TANF families. That number is the numerator and BBER data is the

For example: TANF reports that 90% of its head of household recipients are White. There were 25,136 TANF children. 90% of 25136 = 22622 White child recipients. BBER estimates that there are a total of 459,634 White children ages 0-19. 22,622 is 4.9% of 459,634, therefore 5% of White children are in TANF families.

 Section Number: Form21\_Indicator 09A Field Name: HSIRace\_MedicaidNo Row Name: Number enrolled in Medicaid

Column Name: Year: 2011 Field Note:

Source: Medicaid Report number AH100589 FFY08

Medicaid report combines "Asian" and "Native Hawiian/Other Pacific Islander, " and also combines "More than one race reported" and "Other and Unknown." Medicaid report distinguishes between "Caucasian" and "Hispanic" which are combined as "White" on this form.

4. Section Number: Form21\_Indicator 09A Field Name: HSIRace\_SCHIPNo Row Name: Number enrolled in SCHIP

Column Name: Year: 2011 Field Note:

Source: Medicaid Report number AH100589 FFY08

Medicaid report combines "Asian" and "Native Hawiian/Other Pacific Islander, " and also combines "More than one race reported" and "Other and Unknown." Medicaid report distinguishes between "Caucasian" and "Hispanic" which are combined as "White" on this form.

 Section Number: Form21\_Indicator 09A Field Name: HSIRace\_FoodStampNo

Row Name: Number enrolled in food stamp program

Column Name: Year: 2011 Field Note:

Food Stamp information is reported in percentages. Numbers are estimated based on race of head of household food stamp recipients. For example: It was reported that 84.2% of Food Stamp recipient heads of household were White. There were 136,794 individual child recipients of Food Stamps. 84.2% of 136,794 = 115,180 White child Food Stamp recipients.

6. Section Number: Form21\_Indicator 09A

Field Name: HSIRace WICNo

Row Name: Number enrolled in WIC

Column Name: Year: 2011 Field Note:

For number of children enrolled in WIC: Data Note for title V MCH: These are calendar year 2008 WIC data for clients who were actually seen in 2008 in contrast to those who had a certification period that began, ended or continued in 2008 but who may not have been seen. There were an additional 10,970 who had an active certification but who were not seen; these include children who reached 5th birthday, moved or dropped out of WIC. There is an under-count of infants who were born in November and December 2008 due to unresolved issues in the programming to abstract records from the WIC system. It's estimated that the undercount was on the order of 1500 infants. This under-count has been present in all previous years as well; and will be resolved in the coming year.

 Section Number: Form21\_Indicator 09A Field Name: HSIRace\_JuvenileCrimeRate

Row Name: Rate (per 100,000) of juvenile crime arrests

Column Name: Year: 2011 Field Note:

Other and Unknown = 15719 beacause Juvenile Justice does not subset Hispanic ethnicity by race.

Section Number: Form21\_Indicator 09A
 Field Name: HSIRace\_DropOutPercent

Row Name: Percentage of high school drop-outs (grade 9 through 12)

Column Name: Year: 2011 Field Note:

High School dropout numbers: (First number is percent of enrollees that dropped out, subsequent numbers should be read as "percent of dropouts that were X race")

White = 3715 Black = 143 AINA = 1149

Asian/Native Hawaiian/Other Pacific Islander = 40

Total dropouts = 4507

Total Enrollment 2006-2007 was 100,134 for grades 9-12 (2007-2008 total enrollment numbers not available at this time.

Department of Education did not report "More than one race" or "Other and Unknown"

 Section Number: Form21\_Indicator 09B Field Name: HSIEthnicity\_WICNo Row Name: Number enrolled in WIC

Column Name: Year: 2011 Field Note:

For number of children enrolled in WIC: Data Note for title V MCH: These are calendar year 2008 WIC data for clients who were actually seen in 2008 in contrast to those who had a certification period that began, ended or continued in 2008 but who may not have been seen. There were an additional 10,970 who had an active certification but who were not seen; these include children who reached 5th birthday, moved or dropped out of WIC. There is an under-count of infants who were born in November and December 2008 due to unresolved issues in the programming to abstract records from the WIC system. It's estimated that the undercount was on the order of 1500 infants. This under-count has been present in all previous years as well; and will be resolved in the coming year.

10. Section Number: Form21\_Indicator 09B Field Name: HSIEthnicity\_DropOutPercent

Row Name: Percentage of high school drop-outs (grade 9 through 12)

Column Name: Year: 2011 Field Note:

28.5 percent of dropouts were not Hispanic, 71.4 percent of dropouts were Hispanic.

11. Section Number: Form21\_Indicator 10

Field Name: Metropolitan

Row Name: Living in metropolitan areas

Column Name: Year: 2011 Field Note:

Approximately 51% of children 0-19 live in metropolitan areas in New Mexico.

12. Section Number: Form21\_Indicator 10

Field Name: Frontier

Row Name: Living in frontier areas

Column Name: Year: 2011 Field Note:

Frontier includes "Sub-Frontier"

13. Section Number: Form21\_Indicator 11

Field Name: S11\_100percent Row Name: 100% of poverty

Column Name: Year: 2011 Field Note:

Percent report of below 100% poverty is actually below 125% of poverty.

 Section Number: Form21\_Indicator 09A Field Name: HSIRace\_FosterCare

Row Name: Number living in foster home care

## FORM 12 TRACKING HEALTH OUTCOME MEASURES [SECS 505 (A)(2)(B)(III) AND 506 (A)(2)(A)(III)] STATE: NM

Form Level Notes for Form 12

### FORM 16 STATE PERFORMANCE AND OUTCOME MEASURE DETAIL SHEET STATE: NM

SP(New for Needs Assessment cycle 2011-2015) #\_\_\_\_\_1

PERFORMANCE MEASURE:

Increase the percent of mothers receiving support services through community home visiting/support programs

STATUS:

Active

GOAL

Increase the amount of new mothers with access to community home visits and support programs

**DEFINITION** 

There are increasing challenges to parenting and providing stable family life as demonstrated by the following: changes in family structure--increase in teen & single parents and those not prepared to parent their children; increased divorced rate, children spending less time with their parents and more children living in foster homes; increased exposure to violence through media; increasing number of children living in poverty

Numerator:

Number of new NM mothers who selected answer "e" on question #65 in the NM PRAMS survey, "Since your new baby was born, have you participated in any of these services?...Home visiting services by a nurxe, social worker, or other health care worker." use home visiting services and support programs

Denominator:

Number of NM mothers that completed the PRAMS survey.

Units: 100 Text: Percent

**HEALTHY PEOPLE 2010 OBJECTIVE** 

N/A

**DATA SOURCES AND DATA ISSUES** 

NM PRAMS Survey

SIGNIFICANCE

asdfasdfasdf

SP(New for Needs Assessment cycle 2011-2015) #

PERFORMANCE MEASURE: Decrease the percent of women with a live birth who had no health care coverage for prenatal care.

STATUS: Active

GOAL Increase health care coverage for prenatal care.

**DEFINITION** Covererage for prenatal care is health care coverage for the regular care women should receive from a qualified prenatal

care provider such as a midwife, physician, or other clinical practitioner.

Number of mothers responding to the PRAMS survey who answered "Personal income" to question 18, "How was your prenatal care paid for?" and/or "I don't have health insureance" to question 62, "During your most recent pregnancy, what

was the name of your health insurance?"

Denominator:

Number of NM mothers that completed the PRAMS survey.

Units: 100 Text: Percent

Increase the proportion of pregnant women who receive early and adequate prenatal care. **HEALTHY PEOPLE 2010 OBJECTIVE** 

**DATA SOURCES AND DATA ISSUES** NM PRAMS Survey.

SIGNIFICANCE Too many women lack health care coverage, which often results in their seeking care late or not at all. SP(New for Needs Assessment cycle 2011-2015) #\_\_\_\_\_\_3

PERFORMANCE MEASURE: Reduce unintended pregnancy in New Mexico to less than 30% of births

STATUS: Active

GOAL To improve maternal and infant health by reducing unintended pregnancy in New Mexico to less than 30% of live births.

**DEFINITION**Unintended pregnancies are those that a mother reported as not wanted or wanted later; Intended pregnancies are those a

mother reported as wanted then or sooner.

Numerator

Number of mistimed and unwanted births from NM PRAMS

Denominator:

Number of NM Resident Births
Units: 100 Text: percent

**HEALTHY PEOPLE 2010 OBJECTIVE** 

DATA SOURCES AND DATA ISSUES NM PRAMS: 1997 is our first year of data; data will be ready for analysis in November 1998. Vital records for 1997 closed in

July 1998; data are weighted by CDC PRAMS, accounting for factors in the sample frame, response rates per stratum, and response rate per question. Henceforth, data for each year will be produced the winter of the following year, 1998 data in

November 1999 and so on.

SIGNIFICANCE Unintended pregnancy is associated with demographic characteristics of teen ages, single women/men, lower education

and income levels in women and men; maternal health problems of poor access to family planning services, late prenatal care, smoking, family violence and other family stressors; infant outcomes of low birth weight, late or no infant health care

including imunizations.

SP(New for Needs Assessment cycle 2011-2015) # 7 **PERFORMANCE MEASURE:** Reduce the proportion of women who report being physically abused by husband or partner during pregnancy. STATUS: To improve the health and well being mothers and to reduce family violence and the risk of children being exposed to family GOAL **DEFINITION** Rate: Weighted percent of women who report physical abuse by partner in pregnancy from PRAMS surveillanc Numerator: Number women abused is an estimate derived from PRAMS surveillanc Denominator: Denominator Population of live births, estimate derived from PRAMS surveillance Units: 100 Text: Percent **HEALTHY PEOPLE 2010 OBJECTIVE** See related HP 2010 objectives: No specific Healthy People 2010 Objective for this age group and gender. Related Objective: 15-34: Reduce the rate of physical assault by current or former intimate partners. Target 3.3 physical assaults per 1,000 persons age 12 and older. Bseleine was 4.4 in 1998. Disparities reported: rate for females was 7.2 per 1,000 females; males 1.3 per 1,000 males.

**DATA SOURCES AND DATA ISSUES** There may be under-reporting due to the nature of the question. Prenatal physical abuse of mothers can result in fetal death, early labor, preterm, low birthweight or maternal medical **SIGNIFICANCE** 

problems. It is associated with severe emotional distress and threatens healthy family life. Children who are exposed to domestic violence are at increased risk for behavioral difficulties, emotional problems, poor academic performance, delinquency and impaired health during adulthood

This data is collected by the Pregnancy Risk Assessment Monitoring System, it is a core question for all PRAMS states.

8 SP(New for Needs Assessment cycle 2011-2015) #

PERFORMANCE MEASURE: Increase the proportion of women who exclusively breastfeed their babies through six months.

STATUS: Active

GOAL To increase to 25% the percent of mothers report exclusively breastfeeding their infants at six months of age.

**DEFINITION** Exclusive breastfeeding is defined as ONLY breast milk — NO solids, no water, and no other liquids.

Mothers with infants born in survey cohort that participate in the National Immunization Survey, who report they they

exclusively breastfed their infants throgh six months of age.

Denominator:

Mothers with infants born in survey cohort that participate in the National Immunization Survey.

Units: 100 Text: Percent

**HEALTHY PEOPLE 2010 OBJECTIVE** 

Increase the proportion of mothers who breastfeed exclusively through six months

**DATA SOURCES AND DATA ISSUES** 

Centers for Disease Control and Prevention National Immunization Survey

**SIGNIFICANCE** 

Breast milk is widely acknowledged to be the most complete form of nutrition for infants, with a range of benefits for infants' health, growth, immunity, and development. The benefits of exclusive breastfeeding include decreased new cases or severity of diarrhea, respiratory infections, and ear infections, others, and reduced cost to the family. In addition, breastfeeding has been shown to improve maternal health, with demonstrated effects, including reduction in postpartum bleeding, earlier return to prepregnancy weight, reduced risk of premenopausal breast cancer, and reduced risk of osteoporosis, continuing long after the postpartum period.
